👤 ABOUT ME

I'm a frontend web developer who loves turning ambiguous ideas into polished, shippable products. I've spent the last several years working with Vue and React on the front end with a focus on clean UX, and code that's easy to maintain. When I'm not shipping features, I'm usually tinkering on side projects like QuickResumeBuilder.

📁 WORK EXPERIENCE

● Jun 2022 – Dec 2025

Frontend Developer at Logio

Prague, Czech Republic

- Worked on apps in retail and logistics
- Implemented UI components from Vuetify library
- Wrote custom components as a workaround for few broken components in Vuetify
